0 800 009 110
(toll-free)

or on **Santé.fr**

Covid Vaccines - Useful information

Getting your vaccine: it's all about protecting yourself

Thanks to the vaccines, you body learns to recognise Covid and defend itself.

The Covid vaccines are highly effective at **protecting against severe and fatal forms** of Covid-19.
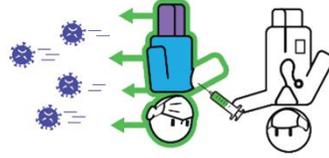

The vaccines are free for everyone.

If I have a health condition (such as diabetes, cancer or an uncommon condition), can I get vaccinated?

Yes

If you have a health condition, You should get vaccinated because you could easily develop a severe and fatal form of Covid-19. The vaccine will help you to fight the virus.

If I've already had Covid-19, should I get vaccinated?

Yes

Even if you've already had Covid-19, you should get vaccinated. You can do so between three and six months after having been unwell, with just one dose (instead of two doses).

**If I am vaccinated, can I return to normal and stop wearing a mask?**

NO

Even if you are vaccinated, you must continue to wear a mask and take protective measures until the whole population is vaccinated.

If I am vaccinated, can I travel more easily?

NO

Even if you are vaccinated, you must take a PCR test 72 hours before travelling, until the whole population is vaccinated. This test is free and doesn't hurt. You should check the rules of each country before you travel.
