

Covid Vaccines - Useful information

25 March 2021

Getting your vaccine: it's all about protecting yourself

Thanks to the vaccines, your body learns to recognise Covid and defend itself.

The Covid vaccines are highly effective at **protecting against severe forms** of Covid-19.

The vaccines are free for everyone.

Where to get vaccinated?

You can get vaccinated:

- In a **vaccine centre**
 0 800 009 110  vw.santé.fr

Any questions?

Ask a healthcare professional, a social worker, in your *mairie* (town hall)

or on

To get vaccinated:

0 800 009 110

(toll-free)

or on

Santé.fr

Covid Vaccines - My Questions

If I have a health condition (such as diabetes, cancer or an uncommon condition), can I get vaccinated?

 **Yes**

If you have a health condition, You should get vaccinated because you could easily develop a severe and fatal form of Covid-19. The vaccine will help you to fight the virus.

If I've already had Covid-19, should I get vaccinated?

 **Yes**

Even if you've already had Covid-19, you should get vaccinated. You can do so between three and six months after having been unwell, with just one dose (instead of two doses).

If I am vaccinated, can I return to normal and stop wearing a mask?

 **No**

Even if you are vaccinated, you must continue to wear a mask and take protective measures until the whole population is vaccinated.

If I am vaccinated, can I travel more easily?

 **No**

Even if you are vaccinated, you must take a PCR test 72 hours before travelling, until the whole population is vaccinated. This test is free and doesn't hurt. You should check the rules of each country before you travel.
